

5. Using a relevant database management software of your choice create a database named stock and use it to create the table below

Item	Qty	Amount	Tax	Tithe	Net
Sugar	4				
Mandazi	7				
Bread	9				
Beans	2				
Pens	6				
Total					

Calculate;

- i) Amount if amount is  $3000 * Qty$
- ii) Tax if tax is 5% of the amount
- iii) Tithe if tithe is 10% of the amount
- iv) Net if new is (Amount – tax )
- v) Format background color green
- vi) Calculate the total amount
- vii) Save your work as YENG on your CDs
- viii) Print your work
