 Paper 2/3

Lab exercise 3

INSTRUCTIONS:

Attempt **all** *questions*

1. Lab exercise three

Type the text below as it is

Well, there's a very simple answer to this: the router does not know : Either the entire Ethernet interface goes down, in which case both next hops become unreachable anyway, or the Ethernet interface stays up and in this case, the router has no direct way of knowing that one of the next hops went down. (04mks)

a) Format the text color blue   (01 mk)
b) Bold the first letter of the paragraph   (01mk)
c) Insert a heading "How router can know that the next hope is down"
                                                                        (01mk)
